| AUTHOR INDEX, Volume 79, Number 1, November 7, 1977                                                                                                                                                                   | ii  |
| F. J. DARFLER and G. V. MARINETTI. Synthesis of a Photoaffinity Probe for the Beta-Adrenergic Receptor                                                                                                                | 1   |
| BRUCE J. BAUM, JOHN A. McDONALD, and RONALD G. CRYSTAL. Metabolic Fate of the Major Cell Surface Protein of Normal Human Fibroblasts                                                                                  | 8   |
| J. R. LUDWIG II, S. G. OLIVER, and C. S. McLAUGHLIN. The Effect of Amino Acids on Growth and Phosphate Metabolism in a Prototrophic Yeast Strain                                                                      | 16  |
| JOCELYN COUSINEAU and THOMAS MING SWI CHANG. Formation of Amino Acid from Urea and Ammonia by Sequential Enzyme Reaction Using a Microencapsulated Multi-Enzyme System                                                | 24  |
| S. SZABO, K. A. BAILEY, P. J. BOOR, and R. J. JAEGER. Acrylonitrile and Tissue Glutathione: Differential Effect of Acute and Chronic Interactions                                                                     | 32  |
| RANDOLPH R. HENKE and ROSEMARIE WAHNBAECK. $\beta$ -Aspartokinase from Developing Endosperm of Maize                                                                                                                  | 38  |
| STEVEN CLARKE. The Interaction of Triton X-100 with Soluble Proteins: Possible Implications for the Transport of Proteins across Membranes                                                                            | 46  |
| STEVEN L. MENDELSON, STEVEN K. NORDEEN, and DONALD A. YOUNG. Rapid Changes in Initiation-Limited Rates of Protein Synthesis in Rat Thymic Lymphocytes Correlate with Energy Charge                                    | 53  |
| BRONISLAW L. SLOMIANY and AMALIA SLOMIANY. Partial Characterization of Glyceroglucolipids from Human Saliva                                                                                                           | 61  |
| H. MONDAL. Occurrence of Particle-Bound Reverse Transcriptase in Human Amniotic Fluid                                                                                                                                 | 67  |
| HIROBUMI TERAOKA, SANAE TAMURA, and KINJI TSUKADA. A Novel Nuclease from Mitochondria of Rat Liver                                                                                                                    | 76  |
| MAURILLIO DE FELICE and MARK LEVINTHAL. The Acetoxyhydroxy Acid Synthase III Isoenzyme of <i>Escherichia coli</i> K-12: Regulation of Synthesis by Leucine                                                            | 82  |
| ULRICH FEIGE, BARBARA JANN, KLAUS JANN, GUNTER SCHMIDT, and STEPHAN STIRM. On the Primary Structure of the <i>Escherichia coli</i> R4 Cell Wall Lipopolysaccharide Core                                               | 88  |
| ATIF M. NAKHLA and ADHIP P. NANDI MAJUMDAR. Tryptophan Force-Feeding: Changes in the Activities of Acetylcholinesterase in Various Tissues of Well-Fed Normal and Adrenalectomized Rats                               | 96  |
| R. DRILLIEN, D. SPEHNER, and A. KIRN. Cell Killing by Frog Virus 3: Evidence for Cell Killing by Single Viral Particles or Single Viral Subunits                                                                      | 105 |
| JAN MESTER, CLAUDE GAYNET, NADINE BINART, and ETIENNE-EMILE BAULIEU. Retarded Administration of an Antagonist Stops Steroid Hormone Action                                                                            | 112 |
| G. S. GERMAIN and R. M. ARNESON. Selenium Induced Glutathione Peroxidase Activity in Mouse Neuroblastoma Cells                                                                                                        | 119 |
| F. D. SAUER, R. S. BUSH, S. MAHADEVAN, and J. D. ERFLE. Methane Production by Cell-Free Particulate Fraction of Rumen Bacteria                                                                                        | 124 |
| DAMON C. HERBERT and EDWARD G. RENNELS. Effect of Synthetic Luteinizing Hormone Releasing Hormone on Prolactin Secretion from Clonal Pituitary Cells                                                                  | 133 |
| BROR EDLUND, ORJAN ZETTERQVIST, ULF RAGNARSSON, and LORENTZ ENGSTROM. Phosphorylation of Synthetic Peptides by ( $^{32}$ P)ATP and Cyclic GMP-Stimulated Protein Kinase                                               | 139 |
| DEBORAH A. EPPSTEIN and CHARLES E. SAMUEL. Mechanism of Interferon Action. Partial Purification and Characterization of a Low-Molecular-Weight Interferon-Mediated Inhibitor of Translation with Nucleolytic Activity | 145 |
| FYFE L. BYGRAVE and ROBYN L. SMITH. Dietary-Induced Modification of Calcium Transport in Mitochondria Isolated from Flight-Muscle of Developing Sheep Blowfly <i>Lucilia cuprina</i>                                  | 154 |
| NEAL F. BELLET, JUDITH P. VACQUIER, and VICTOR D. VACQUIER. Characterization and Comparison of "Bindin" Isolated from Sperm of Two Species of Sea Urchins                                                             | 159 |
| NATHAN B. PLIAM and IRA D. GOLDFINE. High Affinity Thyroid Hormone Binding Sites on Purified Rat Liver Plasma Membranes                                                                                               | 166 |
| LESLIE J. DeGROOT, ALDO H. COLEONI, PAUL A. RUE, HISAO SEO, ENJO MARTINO, and SAMUEL REFETTOFF. Reduced Nuclear Triiodothyronine Receptors in Starvation-Induced Hypothyroidism                                       | 173 |
| SHUJI SEKI, KEN TSUTSUI, and TAKUZO ODA. Effect of Aurintricarboxylic Acid on <i>in Vitro</i> DNA Synthetic Activity of Mouse Ascites Sarcoma Cells                                                                   | 179 |
| ANTHONY M. SUN, GEORGE M. HEALY, IVAN VACEK, and HILDA G. MACMORINE. Insulin Secretion from a Continuously Subcultivable Isolate Derived from Foetal Bovine Pancreatic Beta Cells: I. Monolayer Cultures              | 185 |
| D. J. PRINCE, D. J. CUMMINGS, and R. L. SEALE. Analysis of Chromatin Repeat Units in Logarithmically and Stationary Growing Cells of <i>Paramecium aurelia</i> and <i>Tetrahymena pyriformis</i>                      | 190 |
| JOEL S. GOLDBERG, ELMER J. RAUCKMAN, and GERALD M. ROSEN. Bioreduction of Nitroxides by <i>Staphylococcus aureus</i>                                                                                                  | 198 |
| S. C. BRATCHER and M. J. KRONMAN. Reaction of the Thiol Groups of <i>E. coli</i> RNA Polymerase with 7 Chloro-4-Nitrobenzo-2 Oxa-1,3 Diazole                                                                          | 203 |

# CONTENTS OF VOLUME 79

|                                                                                                                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| RAIMUNDO VILLEGAS, GLORIA M. VILLEGAS, FLOR V. BARNOLA, and EFRAIM RACKER. Incorporation of the Sodium Channel of Lobster Nerve into Artificial Liposomes .....                                                                                  | 210 |
| B. WIGGERT, P. RUSSELL, M. LEWIS, and G. CHADER. Differential Binding to Soluble Nuclear Receptors and Effects on Cell Viability of Retinol and Retinoic Acid in Cultured Retinoblastoma Cells ..                                                | 218 |
| SUSANNA LILES and J. RAMACHANDRAN. Regulation of $\Delta^5$ - $\beta$ -Hydroxysteroid Dehydrogenase-Isomerase Activity in Adrenocortical Cell Cultures by Adrenocorticotropin .....                                                              | 226 |
| E. PEDROZA, J. A. VILCHEZ-MARTINEZ, J. FISHBACK, A. ARIMURA, and A. V. SCHALLY. Binding Capacity of Luteinizing Hormone-Releasing Hormone and Its Analogues for Pituitary Receptor Sites .....                                                   | 234 |
| MARIA F. MELDOLESI, ROBERT M. FRIEDMAN, and LEONARD D. KOHN. An Interferon-Induced Increase in Cyclic AMP Levels Precedes the Establishment of the Antiviral State .....                                                                         | 239 |
| SHISHIR KR. DAS. Primer-Mediated Inhibition of the Hydrolysis of Template DNA by T5-Induced DNA Polymerase .....                                                                                                                                 | 247 |
| ANDRAS PATTHY, LASZLO GRAF, AGNES KENESSEY, JOZSEF I. SZEKELY, and SANDOR BAJUSZ. Effect of Bacitracin on the Biodegradation of $\beta$ -Endorphin .....                                                                                         | 254 |
| HIDEO NAKAGAWA, UICHIRO IZUMI, and SUSUMU TSURUFUJI. The Presence of Partially Degraded Collagen Fragments in the Resorbing Granulation Tissue in Rats .....                                                                                     | 260 |
| JUDITH CHEBATH, ODILE CHABAUD, JEAN-LOUIS BERGE-LEFRANC, GUY CARTOUZOU, and SERGE LISSITZKY. Molecular Weight of the Thyroglobulin Messenger RNA of Sheep Thyroid Gland .....                                                                    | 267 |
| CATHERINE GRENOT and CLAUDE-YVES CUIILLERON. Isolation of Antibodies to Steroid Hormones by Affinity Chromatography on Antigen-Linked Sepharose: An Efficient Electrophoretic Elution Procedure .....                                            | 274 |
| HIROSHI NAKADA, IKUO FUNAKOSHI, and IKUO YAMASHINA. Changes in the Lectin Binding Capacities of Hepatoma Cells after Treatment with Chondroitinase .....                                                                                         | 280 |
| ROGER SANTALA and LUIS GLASER. The Effect of Cell Density on the Expression of Cell Adhesive Properties in a Cloned Rat Astrocytoma (C-6) .....                                                                                                  | 285 |
| N. SHAMALA, R. NAGARAJ, and P. BALARAM. The Crystal and Molecular Structure of the Amino Terminal Tetrapeptide of Alamethicin. A Novel $3_{10}$ Helical Conformation .....                                                                       | 292 |
| R. N. FABRICANT, J. E. DE LARCO, and G. J. TODARO. Binding and Thermal Dissociation of Nerve Growth Factor and Its Receptor on Human Melanoma Cells .....                                                                                        | 299 |
| ROBERT R. GORMAN, FRANK A. FITZPATRICK, and OLGA V. MILLER. A Selective Thromboxane Synthetase Inhibitor Blocks the cAMP Lowering Activity of PGH <sub>2</sub> .....                                                                             | 305 |
| JOHN E. MORLEY, TODD J. GARVIN, A. EUGENE PEKARY, and JEROME M. HERSHMAN. Thyrotropin-Releasing Hormone in the Gastrointestinal Tract .....                                                                                                      | 314 |
| Y. YOSHINAKA and R. B. LUFTIG. Characterization of Rauscher Leukemia Virus (RLV) P40-42, an Intermediate Cleavage Product of the Group Specific Antigen (gag) Precursor Polypeptide, P65-70 ..                                                   | 319 |
| LELAND D. LOOSE, JAY B. SILKWORTH, and DIANE WARRINGTON. Cadmium-Induced Depression of the Respiratory Burst in Mouse Pulmonary Alveolar Macrophages, Peritoneal Macrophages and Polymorphonuclear Neutrophils .....                             | 326 |
| ARMEN H. TASHJIAN, JR., ROSEMARIE OSBORNE, DONNA MAINA, and ANOUSH KNAIAN. Hydrocortisone Increases the Number of Receptors for Thyrotropin-Releasing Hormone on Pituitary Cells in Culture .....                                                | 333 |
| DON SMALL, PETER Y. CHOU, and GERALD D. FASMAN. Occurrence of Phosphorylated Residues in Predicted $\beta$ -Turns: Implications for $\beta$ -Turn Participation in Control Mechanisms .....                                                      | 341 |
| ERRATUM. Volume 77, Number 2, July 25, 1977, Kenji Sorimachi and Peter G. Condliffe, "Two-Stage" Gel Electrophoresis: Application to the Separation of Bovine Thyroid Stimulating Hormone Sub-Units and Calf Thymus Histones," pp. 526-532 ..... | 347 |

Volume 79, Number 2, November 21, 1977

## Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

**To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.**

### Preparation of Manuscripts

*Article length* should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

*Summary.* Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

*Typing.* Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

*Symbols and Abbreviations* defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) 115, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

**Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals.** The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [<sup>32</sup>P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) 160, iii–xii. Reprints are available from the Publisher.

*Footnotes, references, and figure legends* should be typed single-spaced on separate pages.

*Illustrations and Tables.* **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.) ; the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

*Page Numbers and Headings.* Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

*References* to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969*. Note the following examples.

For a journal article:

1. Chatteraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363–370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298–302, Academic Press, New York.

**Note that inclusive pagination must be given.**

*Acknowledgment of Receipt.* Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

*Reprints.* Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
